

## Add Video & Lights Without Clutter.

Get freedom to capture more with the secure, all-in-one bike mount solution for your action video camera, visibility lights, and other accessories with 1/4"-20 mounts (Garmin® computer, smartphone with GripTight, etc.)

### Features & Benefits

- **Low-profile and rigid form factor easily clamps to bicycle handlebars**  
Fits any handlebar with included inserts – from 22.2mm to 35mm size, which covers road, mountain, hybrid, cruiser, fixie, and other types of bikes.
- **Designed with 3 attachment point options so you can mount your action video camera at the preferred angle**  
Multiple mounting points to give you the flexibility to mount accessories to the top, front, or back – you decide where you want to capture your footage.
- **Includes front white light and rear red visibility lights with built-in 1/4"-20 design**  
Designed for true flexibility, you can secure these lights on the mount, or attach them separately to your bike with the stretchable bands. Turn on with the simple push of a button for a single light or flashing mode.
