www.energizer.co.za

A COMPLETE LIGHT RANGE FOR DEMANDING NEEDS

1 INSPECTION LIGHT

- For Precise, close-up work
- Wide beam
- Built-in clip

2 HANDHELD FLASHLIGHTS

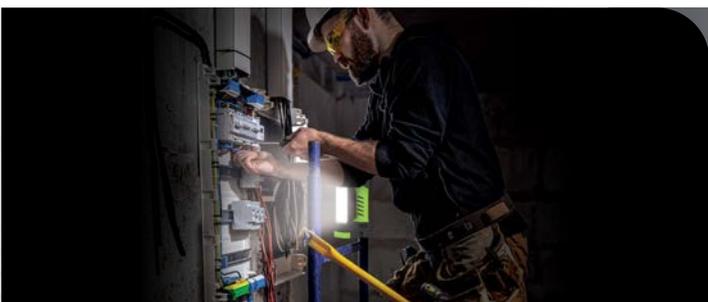

- Long beam distance Lights
- Powerful LED Technology
- Wide or narrow beam

2 HEADLAMPS

- Hands-free
- Pivoting head to direct light where needed
- Multiple modes for versatility

1 WORKLIGHT

- 2 in 1: area light or directional light
- Light a wide space
- Hanging or self-standing
- Powerful LED Technology

Always disconnect power. Always be particularly careful when working with electrical wiring. Consult a qualified electrician if you are at all unsure about an electrical project.

WITH GREAT FEATURES!

RECHARGEABLE / HYBRID

The Energizer® Pro Series Lights are equipped with rechargeable lithium ion batteries.

Standard batteries can also be inserted directly to the device or using an external cartridge to make sure you always have power and light when you need it.

HIGH COLOR RENDERING INDEX (CRI)

The Energizer® Pro Series Lights have a high CRI of at least 90/100 providing to professionals high-definition color quality.

The Color Rendering Index (CRI) is a measure of how accurately a light source can reproduce the colors of various objects in comparison to natural sunlight or a reference light source.

ROBUSTNESS

The Energizer® Pro Series Lights are durable : they are drop resistant (at least 2 meters) and withstand demanding conditions..

They ensure that professionals have a dependable source of illumination even in challenging situations.

INGRESS PROTECTION (IP67) : DUSTPROOF & WATERPROOF

The Energizer® Pro Series Lights are rated IP67!

They are designed to meet the challenges professionals face in demanding environments by providing a high degree of protection against dust (no Ingress of dust from 2 to 8 hours) and water (resist water immersion for 30 min at 1 meter of depth).

Always disconnect power. Always be particularly careful when working with electrical wiring.
Consult a qualified electrician if you are at all unsure about an electrical project.

NEVER RUN OUT OF POWER PREFER ULTIMATE LITHIUM™ OUR BEST SOLUTION

Batteries can be inserted using a cartridge or directly to the device

**STRONGLY
RECOMMENDED**

ULTIMATE LITHIUM™

The Pro Series are the perfect match with Ultimate Lithium™

- **World's longest lasting AA battery**
- Delivers up to **6X longer runtime**⁽¹⁾
- Provides a **constant beam**
- Performs in extreme temperatures from **-40°C to 60°C**
- **33% lighter** than alkaline batteries
- **100% Leak Proof**⁽²⁾

**OUR BEST
ALKALINE**

ALKALINE MAX PLUS™

For everyday usage and demanding devices

- **Our #1 Longest Lasting alkaline (AA/AAA)**
- **Made to Last. Not to Leak**
- **12 years** shelf life (AA/AAA)
- Available in **2, 4 & 10 packs** (AA&AAA)
