# 7-Sensor Precise Noise Cancelling

## Liberty 4 Pro

1. Based on tests conducted in the soundcore lab, Liberty 4 Pro can reduce up to 12.2 dB more noise in the 600-700Hz range when tested from the opposite side of the earbud. This improvement is three times more effective than with the adaptive noise cancelling algorithm turned off.  
2. Calculated based on the recalibration frequency of the ANC algorithm, which is three times per second when no audio is being played.

### 3× Stronger<sup>1</sup> Noise Reduction

Liberty 4 Pro noise cancelling earbuds boast 7 sensors—6 sound sensors and 1 barometric pressure sensor—to capture noise from every angle. From planes to trains, enjoy a serene journey with 3× stronger noise reduction.

### Real-Time Reactive Noise Cancelling

These noise cancelling wireless earbuds adapt to your ever-changing environment every 0.3 seconds<sup>2</sup>, ensuring optimal, seamless noise reduction around the clock.

### Hi-Fi Sound with Rich Detail

Feature the enhanced ACAA acoustic architecture, a 10.5mm bass driver, a titanium-coated tweeter, and a digital crossover for peak driver performance. Indulge in crisp, full-bodied sound perfected with nuances.

### Control with Touch Bar and Display

The touch bar and display let you fine-tune the noise-cancelling levels of these wireless earbuds at any time with a simple swipe on the case.

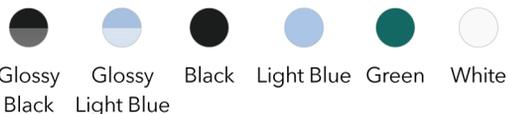

### Super Fast Charging

Liberty 4 Pro noise cancelling earbuds charge 2× faster than the previous models with the 5C battery. A 5-minute recharge offers 4 hours of playtime. Enjoy up to 10 hours between charges, extendable to 40 hours with the case.
