

COYOTE X-PAC® STORY

We're thrilled to introduce Coyote X-Pac® fabric to our Everyday and Travel Bag lines with 11 new special edition bags. Originally a limited edition, this eco-friendly **X-Pac® VX-21 Ocean Edition** features 100% recycled fishing nets and meets Peak Design's sustainability standards. Known for its durability and weather resistance, X-Pac® started as high-performance sailcloth. This launch marks our first use of a third-party shell material, honoring X-Pac®'s commitment to sustainable manufacturing. The new fabric offers a distinctive aesthetic and comparable durability, longevity, weatherproofness, and most importantly sustainability to our Versa Shell™.

COYOTE X-PAC® MATERIAL SPECS

- American Made, Woven in Putnam, CT
- Multilayer laminated construction
- Outer layer is **made from 100% recycled nylon fishing nets**
- Inner layer is solution-dyed recycled poly
- In-between is a **22° diamond patterned** post-consumer recycled 50D polyester thread, called X-PLY®
- PFAS-free. **Uses CO DWR**, a water-repelling treatment that is a more **eco-friendly alternative to traditional DWR** treatments
- This specific material/color-way is **exclusive to Peak Design** bags for the next year.

*Interior fabrics, accent fabrics, and all zippers and hardware on these bags are identical to standard Peak Design bags.
