

Tips for Using soundcore Liberty Buds

Hello,

Thank you for choosing soundcore Liberty Buds. These are our latest semi-in-ear noise-cancelling earbuds, designed to meet your listening needs in a variety of scenarios. They deliver a comfortable fit and high-quality sound for an enhanced listening experience over extended periods.

To ensure you get the best performance, please make sure to wear the earbuds correctly, and also clean them regularly. Here are some tips for using them:

1. Best Way to Wear

Make sure the ear fins are fitted correctly. Properly wearing your semi in-ear earbuds will provide a more comfortable and stable fit while ensuring optimal noise cancellation and sound quality.

1. Select the ear fins that fit you best and remove them according to the instructions in the Quick Start Guide.

How to Choose the Right Ear Fins

Start by wearing the pre-installed No. 2 ear fins. After wearing them properly:

- a. If the ear fins cause pressure or discomfort, switch to the No. 1 or No. 0 ear fins.

b. If there is no proper contact and they feel loose or unstable, switch to the No. 3 ear fins.

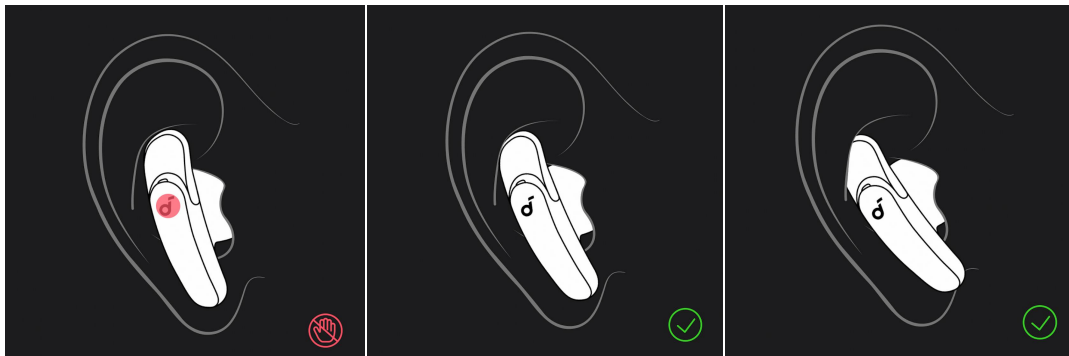

2. Adjust the angle of the earbuds so they fit snugly in your ear canal. (A loose fit will affect noise-cancelling performance.)

How to Wear Correctly

a. Firmly insert the selected ear fins into the concha cymba until you they feel secure. This ensures both a comfortable fit and optimal noise-cancelling performance.

b. To change ear fins, pinch and pull the current ear fins outward to remove. Then, choose the appropriate sizes and install them on the earbuds.

c. When wearing the earbuds, avoid touching the area near the logo to prevent accidental touches.

Check the Fit

Poor Fit
If your ear or ear canal is small, noise cancellation performance may be impacted.

Perfect Fit
Achieved by changing the ear fin size and adjusting the angle for the best noise reduction performance.

Poor Fit
If your ear or ear canal is large, noise cancellation performance may be impacted.

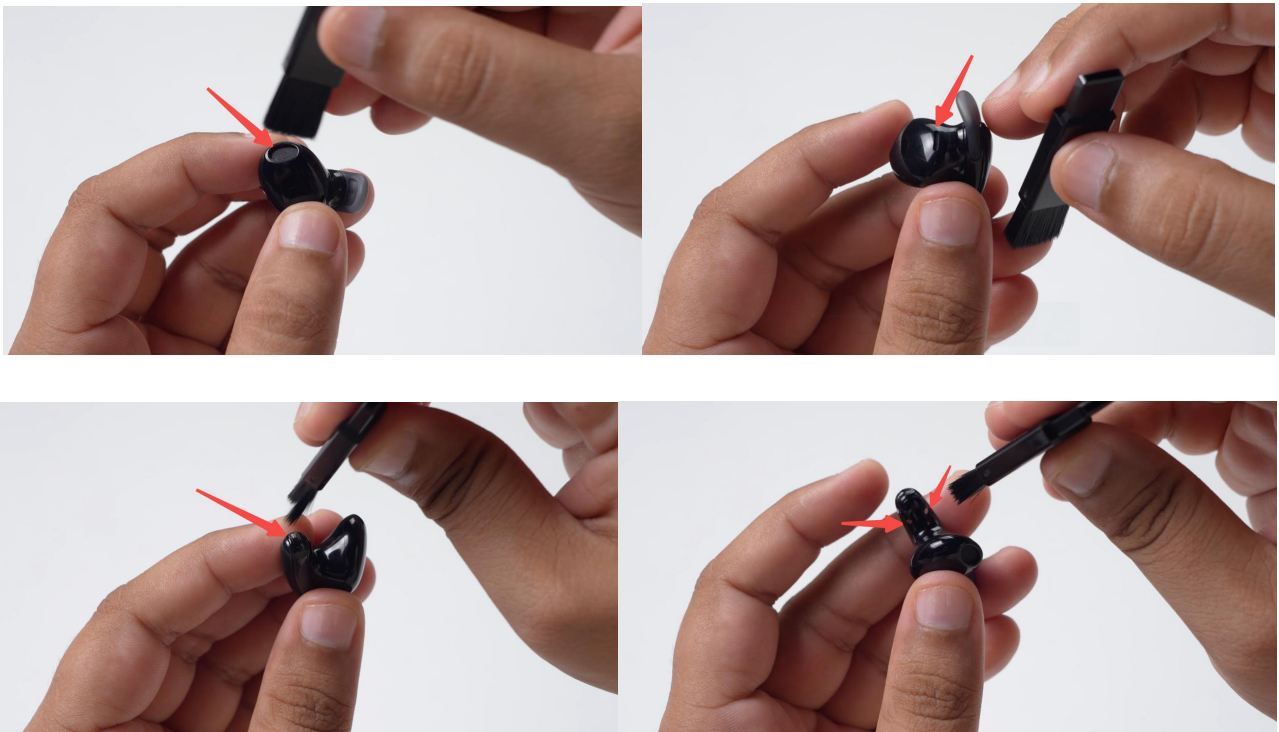

*Note: Noise cancellation performance is affected by the fit. Differences in ear and ear canal size may affect the seal, which means actual noise cancellation performance can vary from person to person.

2.How to Deep Clean Liberty Buds

a. Prepare a cleaning brush and alcohol wipes.

b. Gently brush the nozzle mesh, rear vent holes, microphone area, and pogo pin area in an up-and-down motion for about 15 seconds.

c. Use an alcohol wipe to thoroughly clean these areas.

d. After cleaning, wipe away any remaining alcohol from the earbuds. Wait until they are completely dry before connecting them to your phone and using them again.

3. Battery Life And Fast Charging

Normal Mode: up to 7 hours (earbuds only) / 30 hours (with charging case)

ANC Mode: up to 6 hours (earbuds only) / 26 hours (with charging case)

Fast Charging: 10 minutes charge = up to 4 hours of playtime

4. AI Translation

1. What can AI translation do?

function	description
Face-to-Face Translation	In business communication and cross-border travel, the AI translation feature can be used to have face-to-face conversations with people who speak a different language with virtually no lag.
Real-Time Translation	In settings where you're exposed to content in a foreign language for extended periods (e.g., lectures, classes), real-time translation delivers continuous text display and audio playback of the translated content with almost no lag.
Contextual Learning	While traveling abroad for business or leisure, you can access a collection of common phrases with translations to help you quickly pick up essential phrases.

2. How to Use AI Translation

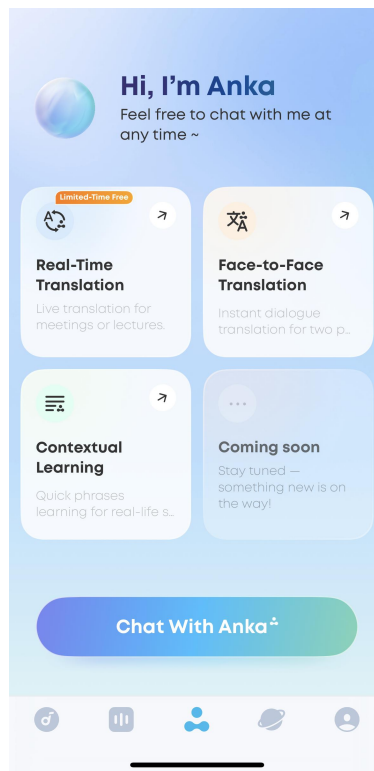

Before Use: Please upgrade to the latest version of the soundcore app and ensure that your earbuds are connected to the app.

Real-Time Translation

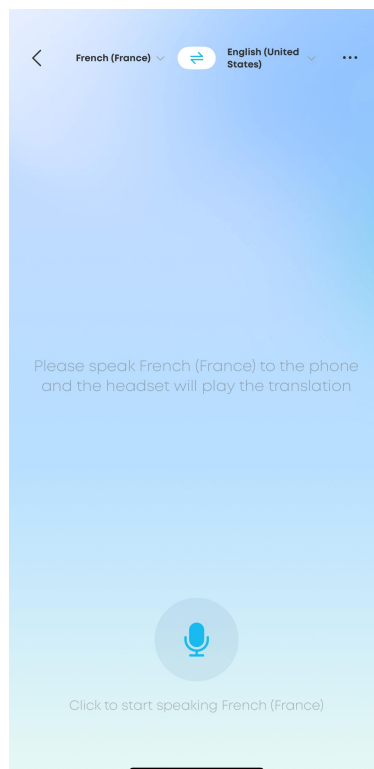

In the soundcore app, go to the **Anka page > Real-Time** Translation. Make sure your earbuds are connected to the soundcore app.

How to use Real-Time Translation:

1. On the Anka page, tap **Real-Time Translation**.

2. Tap the language section at the top of the page, then select the **other person's language** and **your language**.

3. Tap the microphone button to start recording. Tap the left button to pause, and tap the right button to exit real-time translation.

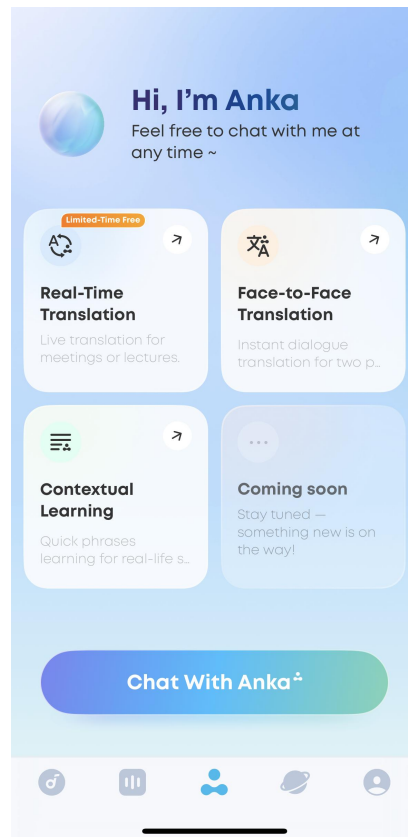

4. Once translation starts, the translated text will be displayed on the page in real time. You'll be able to hear the translated audio through your earbuds.

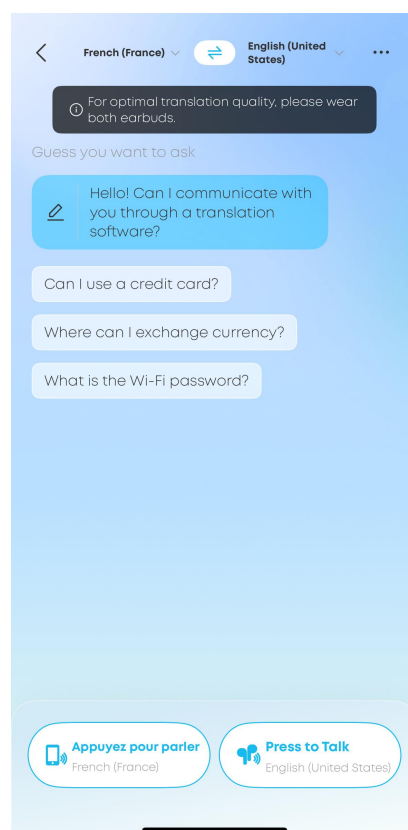

Face-to-Face Translation

In the soundcore app, go to the **Anka page > Face-to-Face Translation**. Make sure your earbuds are connected to the soundcore app.

1. Tap the language section at the top of the page, then select the **other person's language** and **your language**.

2. Tap the bottom-right button and speak into your earbuds—the translated content will be played through your phone.

3. Tap the bottom button and the translated content will be played through your earbuds or phone.

Note:

- The translation feature may be affected by network fluctuations. Please ensure a stable internet connection or switch to a more reliable network environment. Poor network quality may impact your user experience.

If you have any questions or encounter any issues, we are always here to help. Please contact soundcore Support via the Help page in the soundcore app, or email us directly at service@soundcore.com. We will respond within 24 hours.

Sincerely,

The soundcore Team
