

# 24mm F1.4

## ED AS IF UMC

FULL  
FRAME

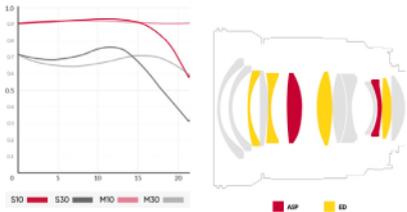

The Samyang 24mm F1.4 ED AS UMC gives you a substantial wide angle of view of 84° with full-frame Canon cameras.

It can also be used with Canon APS-C cameras to provide a 57.6° angle of view basically equivalent to a 35mm lens on a full frame camera.

It works well for landscapes, interiors, street photography and astrophotography.
