1/4"

The Phottix F-180 Light Stand (H/180cm/71") may be the world's shortest light stand height at 46cm when collapsed, easily transported from one location to another, adjustable for many lighting situations.

While compact, It is designed with reverse fold back structure design for simple storage and transport, at making it easy to pack and its weight barely making a dent in your luggage allowance. Quick Release Flip-Locks saving much of your time for your lighting setup best than twist-lock type.
