

# Boom Shock Mounts

## InVision® - Industry-leading shock and handling isolation

InVision shock mounts for Broadcast & Film provide unparalleled protection against shock, vibration, and handling noise for miniature, probe, hand-held, and shotgun microphones. Utilising Rycote patented Lyre® technology, these virtually unbreakable shock mounts are designed with an integral cable clamp, to isolate the microphone from cable and stand-borne noise.

With several models designed for use with a vast number of microphone makes and models, InVision shock mounts for Broadcast & Film suspensions provide outstanding shock and handling isolation performance with microphones mounted to boom poles, as well as floor, desk, and suspended stands.

## Shock Mounts for Slip-on Windshields

Rycote has designed the INV-6 HEAVY and INV-7HG MKIII shock mounts for use with slip-on windshields. Ideal for use with Super-Softie®, Classic-Softie® and BBG Windshield models, these robust shock mounts provide excellent isolation for boom pole and stand mounting applications.

The INV-7HG MKIII is one of our most popular InVision Broadcast & Film shock mounts. Suitable for 19-34mm diameter mics, the incorporated Duo-Lyre shock mount has a special 'soft' grip, moulded into the clip. This securely holds the microphone, preventing any slippage or twisting and providing the necessary stability for slip-on windshields and front-heavy microphones.

## InVision® Softie Lyre Mount

Suitable for microphones from 19-34mm in diameter, the InVision Softie Lyre Mount uses the Lyre system to provide complete isolation against handling and cable-borne noises. Supplied with a lightweight pistol-grip handle for hand-held applications, this flexible system is has a 3/8" thread fitting for boom-pole mounting. With the Duo-Lyre providing support for slip-on windshields - including the Super-Softie, Classic-Softie, and BBG Windshield - this flexible, robust, cost-effective shock mount is built to excel in modern day ENG and location recording applications.

## INV-Lite – The balanced choice for short shotgun mics

The INV-Lite has been designed specifically for interior boom use with a foam windscreen. It offers a more focused solution for smaller, lighter shotgun microphones, allows full placement of a 12cm SGM foam to provide basic wind and plosive protection indoors, and provides super-fast access to the microphone via the revolutionary 'cam-lever' clamp system.

### Elegant. Ergonomic. Balanced.

The unique cam-lever clamp holds the microphone securely, leaving interference slots free, and so improving sound quality and directionality. Adding a foam windscreen, to protect against plosives and light boom swings, is fast and simple.

- Designed for shorter, lighter shotgun mics.
- Unique design ensures cancellation slots are free.
- Patented Lyre® technology with new 'wide' Lyre® design allowing full foam placement.
- Balanced and lightweight, perfect for indoor boom work.
- Revolutionary cam-lever clamp system.
- Robust, reliable Rycote quality.
- Weighs just 115g (without brass screw adaptor).

### Go faster.

The Softie-Lite is a slip-on windshield designed to perfectly complement the INV-Lite shock mount, allowing for even faster/deeper boom swings indoors. Softie-Lite provides more plosive and wind protection than a standard foam.

- Designed specifically for the INV-Lite shock mount.
- For use with shorter, lighter shotgun mics for interior booming.
- Provides more protection against plosives and wind-noise than a foam windshield.
- Allows for outdoor use – in light winds.
- Available in two versions; for 19mm and 21mm microphones respectively.
- Lightweight & compact – just 27g and only 170cm long.

You can buy the Softie-Lite on its own, or as a 'Kit', complete with the INV-Lite shock mount.

## Softie-Lite Kit

The Softie-Lite windshield and the INV-Lite shock mount are also available together, as an all-in-one 'kit', which also includes an XLR cable and holder.

- INV-Lite shock mount, fitted with XLR holder on boss.
- Softie-Lite windshield.
- Pre-fitted XLR cable (XLR-3M to short right-angled XLR-3F).
- Lightweight – just 217g (inc. Softie-Lite).

## InVision® - Boom Shock Mounts

Order Code	Product	For use on	Description & Microphone Compatibility*
041104	INV-4	Stand or boom pole	Suitable for compact condensers. Accommodates windscreen. Compatible mics include the Schoeps CCM series and miniature shotgun mics such as the AKG C747. The 9.5mm Lyre clips feature a 'barrel-style' reducing sleeve which grips the connector and the cable, leaving the body of the microphone free for slip-on solutions such as foams.
041105	INV-5	Stand or boom pole	Suitable for compact and remote capsule condensers. The INV-5 is ideal for compact microphones such as the Schoeps CCM series when used without a large foam windshield. The 62-Shore (19/25) Single Lyre at the front holds a mic body diameter of 19-25mm and the rear, 9.5mm Lyre holds connectors from 8mm to 11mm in diameter (e.g. LEMO).
041106	INV-6	Stand or boom pole	Suitable for short condenser mics (maximum 120mm in length). Compatible mics include Sennheiser MKH 8020/40/50 (when used with their MZX XLR module). The mount features a pair of 72-Shore (19/25) Single Lyre.
041117	INV-6 Heavy	Stand or boom pole	Suitable for short condenser mics (maximum 120mm in length). Supports slip-on windshield. A heavier-grade version of the INV-6, featuring firmer, 82-Shore (19/25) Single Lyre which will support microphones in 'run and gun' scenarios.
041107	INV-7	Stand or boom pole	Suitable for short and medium condenser and short shotgun mics. Ideal for the Schoeps CMC series when used indoors with a foam.
041118	INV-7HG MKIII	Stand or boom pole	Suitable for short and medium condenser and short shotgun mics. Supports slip-on windshield. Ideal for a range of front-heavy microphones, or microphones used with a Softie or BBG windshield.
041108	INV-8	Stand or boom pole	Suitable for 30mm diameter condenser mics. Compatible with the Neumann RSM190/191, Pearl MS8/MSH10 and Sony ECM 999/979/959.
041109	INV-9	Stand or boom pole	Suitable for mics of up to 30mm in diameter, such as the Shure SM57 and SM58, and Neumann KMS105.
041123	InVision BH	Stand or boom pole	Suitable for long shotgun mics, such as the MKH 70 and Neumann KMR 82.
033702	InVision Softie Lyre Mount	Hand held or boom pole	With lightweight Pistol Grip handle; suitable for shotgun mics from 19-34 mm in diameter.

## InVision® 'INV-Lite' - Boom Shock Mounts

Order Code	Product	For use on	Description & Microphone Compatibility*
041136	INV-Lite 19	Stand or boom pole	A balanced, lightweight shock mount for short shotgun mics. Designed specifically for interior boom use with a foam. Super-fast access to the mic facilitated via a unique cam-lever clamp system. Suitable for microphones like the DPA 4017B/C and 4018, the Sanken CS-1e and Sennheiser MKH 8060.
041135	INV-Lite 21	Stand or boom pole	A balanced, lightweight shock mount for short shotgun mics. Designed specifically for interior boom use with a foam. Super-fast access to the mic facilitated via a unique cam-lever clamp system. Suitable for the Schoeps MiniCMIT.
031103	Softie-Lite 19	INV-Lite Mount	Designed to complement the INV-Lite mount, allowing for even faster/deeper boom swings indoors. The Softie-Lite Windshield provides even more plosive and wind protection than a standard foam. Suitable for microphones like the DPA 4017B/C and 4018, the Sanken CS-1e and Sennheiser MKH 8060.
031104	Softie-Lite 21	INV-Lite Mount	Designed to complement the INV-Lite mount, allowing for even faster/deeper boom swings indoors. The Softie-Lite Windshield provides even more plosive and wind protection than a standard foam. Suitable for the Schoeps MiniCMIT.
031101	Softie-Lite Kit 19	Stand or boom pole	Includes INV-Lite and Softie-Lite, as well as a super-low-profile, pre-fitted XLR cable. Suitable for microphones like the DPA 4017B/C and 4018, the Sanken CS-1e and Sennheiser MKH 8060.
031102	Softie-Lite Kit 21	Stand or boom pole	Includes INV-Lite and Softie-Lite, as well as a super-low-profile, pre-fitted XLR cable. Suitable for the Schoeps MiniCMIT.
