

The Genie Family of Motion Controllers - Overview

Designed to be part of your regular camera kit, with a focus on simplifying setup and portability there's no need to ever go without Motion Control again. Create spectacular motion time-lapse, video and panorama in any location.

| | Axis of Movement | iOS & Android App Control | On Board Display | Quick Release | Removable Batteries | Intergrated Joystick |
|--|---------------------|---------------------------|------------------|---------------|---------------------|----------------------|
|  Genie Mini II | Panning | ● | | | | |
|  Genie II Pan Tilt | Panning & Tilting | ● | ● | ● | ● | ● |
|  Genie II Linear | Tracking | ● | | ● | ● | ● |
|  Genie One | Panning or Tracking | ● | | | | |

Features

Multi-Axis Ready

Combine any number of Genie devices together to create up to 3-axis motion, all controlled from the Syrp App.

Syrp Quick Release

Innovative new quick release system makes setup of tripods, sliders and cameras easier than ever.

iOS & Android Control

Control the Genie with a beautifully simple App that accommodates both beginners through to the experienced.

Removable Batteries

Take extra batteries for shooting in remote locations, and swap batteries between Genie II Linear and Pan Tilt.

On Board LCD Display

Setup and shoot time-lapse and video recording directly via the on board display.

Integrated Joystick

Control the Genie via the joystick for instant repositioning and quick 'run and gun' camera movements. Set up basic recordings with Genie II Pan Tilt LCD.
