

Photo Monopod – NGPM001

The National Geographic 4-Section Monopod is lightweight, compact, and ideal for achieving steady photos or videos in environments where a tripod would not be practical – Such as crowds, festivals, tight corners, or uneven, rough terrain.

Featuring a soft foam grip for extra comfort, and an adjustable rubber foot, which incorporates a ground spike to help you stay steady on almost any surface.

The National Geographic Photo Monopod also comes with a smartphone clamp, and carry case included.

Great for DSLR, mirrorless, compact or bridge camera setups up to 3kg, and smartphones up to 8.4 cm (3.2") wide. The monopod extends to an impressive maximum height of 1.7m, and only weighs 373g.

Carry case & smartphone clamp included

Sustainable packaging
