

Photo Tripod Large – NGPT002

Keep all your shots steady with the lightweight and portable National Geographic Photo Tripod, Large.

Thanks to its 3-way head, quick release plate and spirit level, you can position your camera wherever you like to get the perfect shot. Or if smartphone photography is more your style, attach via the included smartphone clamp. You can also rotate the head 90 degrees with a simple adjustment for portrait orientation.

Thanks to the 3 section legs, flip leg locks and mid-level stabilisation you can extend the tripod up to 1.6m without compromising on stability. It also features a geared centre column with crank handle.

Great for DSLR, or mirrorless setups up to 3kg, and smartphones up to 8.4 cm (3.2") wide. The Tripod, Large only weighs 988g.
