WARNING

A small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights and strobing lights. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can trigger these "photosensitive epileptic seizures." These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects. Immediately stop using this product and consult a doctor if you experience any of these symptoms. If you have a history of seizures or epilepsy, consult a doctor before using.
