

Wavo™ AIR

A Wireless Lavalier Kit for Expert Content Creators JB01737–BWW

The Wavo AIR is a super compact, featherweight, and easy-to-use wireless microphone system for Mobile and Camera users that delivers tight, broadcast-quality sound for the latest killer content.

The kit includes a wide selection of accessories, ranging from the classic belt clip to dedicated cold-shoe mount. You also get a magnetic pendant along with both TRS and TRRS cables.

The clip-on transmitter has a built-in mic and it's small and light enough to clip to a top or inside a t-shirt. A purpose built LAV mic is also supplied so you can clip it out of the way on a belt or jeans and only have the mic near your mouth.

The Wavo AIR Kit sets the creator up with two wireless transmitters and two lavalier mics, so works great for interviews.
