

Wavo™ POD

The Gateway Hardware to Streaming Audio
JB01775-BWW

The Wavo POD is a large diaphragm USB mic designed for the latest Podcasting and Live Streaming trend. It features both cardioid and omnidirectional pickup patterns with 24bit/48kHz high resolution sampling rates for some silky-smooth sounds. The simple and refined design empowers even beginners to approach Wavo POD the right way and record high-quality streams or episodes.

The voice is always under control thanks to a zero-latency headphone monitoring 3.5mm jack along the volume and gain knob with one-click integrated mute function.

The kit is also supplied with a distinctively designed pop filter and desk stand allowing multiple recording angles and perfect crisp vocals.

Additional Pop Filter is also available as separate accessory to run interview podcast guests or streaming live with friends.
