

# JOBY SeaPal 6" Dome Cover

Protective Cover for SeaPal 6" Dome  
JB01952-BWW

JOBY<sup>®</sup>  
Sell Sheet

The SeaPal 6" Dome Cover is the perfect choice for SeaPal 6" Dome protection and care. The SeaPal Dome Cover is designed to protect the element from damage whilst the port is either on the waterproof case or not in use.

Made from 4.5mm, High Stretch neoprene, with a tough, highly abrasion resistant Nylon Jersey, laminated inside and out. The neoprene cover neatly stretches over your valuable dome and all-important elements, from uninvited shocks and sharp objects.

Covers can be cleaned and washed in cold soapy water, rinse and air dry.

JOBY has partnered with AquaTech, who has been making water housings for the world's best ocean photographers for over 20 years. We took all of that knowledge and experience and created SeaPal. Whether you're surfing, snorkeling, fishing, freediving, kayaking or just taking photos of the kids in the backyard pool, the SeaPal protects your phone and lets you focus on getting the perfect shot.
