

JOBY Beamo™ Reel Creator Kit

Next-gen mobile vlogging kit for novice creator
JB01862–BWW

This all-in-one kit is smartly crafted for novice content creators and is perfect for any content creation on YouTube, Instagram, TikTok, and more. The kit includes the PodZilla Medium mobile tripod kit, Wavo Mobile vlogging microphone, and Beamo Reel LED light. This ready-to-vlog bundle stabilizes your phone, captures crispy audio, and provides easy-to-use soft lighting.

The all-new Beamo Reel LED light produces flattening light with a built-in diffuser, offering three different color temperature options. It's easy to use for content creators with just a touch of your fingers. Control the brightness and on/off function from the front by simply twisting the rim of the light with your finger while you vlog. You no longer have to reach to the back of the LED to guess where the buttons and dials are located.

Its ergonomic design fits nicely into your palm for handheld lighting. It can also stand on a table or the ground by itself, giving you three different angles. The light can easily be mounted to your camera or smartphone clamp with the included cold shoe adapter when it's being used separately.
