Maintenance

After each use, rinse it thoroughly in fresh water. Dry it before

storing. Store in a dry, cool area.

Warranty info, limit of liability

Thank you for purchasing a JOBY product.

JOBY products are warranted to be fit for the purpose for which they have been designed, and to be free from defects in materials and workmanship.

This guarantee does not cover the product against subsequent damage or misuse. As JOBY SeaPal products are often used in extreme and volatile environments, we are unable to cover for loss or damage of equipment. Loss of income, reputation or other financial expenses, such as personal injury are also not covered by this warranty.

The period of validity of the Standard Limited Warranty is defined by the law in force in the country, state or region where the product is sold. Please retain your receipt as proof of purchase.

Compliance

FCC

FCC ID: 2AWZQ-80425

This device complies with

Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

Please note that changes or modifications not expressly approved by the parts responsible for compliance could void the user's authority to operate the equipment.

Note

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this

equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
