SMOOTH 5S<sup>AI</sup>

# THE AI FLAGSHIP STABILIZER

The Best Gimbal Just Got Better with AI

Masterful Design

AI Tracking

Flagship Standard

\*Please refer to the actual product.

## Masterful Design

ZHIYUN utilizes textured translucent materials and multi-layer spraying techniques to enhance the sensory experience.

## Orthogonal 3-Axis Structure

The orthogonal 3-axis structure allows for unrestricted 360° rotation on the pan axis, ensuring smooth and limitless camera moves.

## All-In-One Control Panel

The full-key control panel featuring parameter adjustments, typically found on high-end cameras, unlocks limitless possibilities.

## Intelligent Algorithms

ZY Cami App supports gesture recognition and control, allowing for precise multi-target tracking.

## Magnetic AI Tracker

The AI tracker responds to multi-task commands and supports remote control, enabling solo video recording from a distance.

## Fill Light Integrated

The gimbal with a fill light supports adding two additional magnetic lights, achieving a combined brightness of up to 2040 Lux.
